Surgeon's judgement of tumor resection

For bone resections:

R0 / wide resection

R1 / marginal resection

R2 / intralesional resection

For soft tissue resections:

R0 / No tumor at inked margin

R1 / Tumor at inked margin:

- Planned close but ultimately positive around critical structure (major vessels(nerve, bone)

- Positive after a tumor bed re-excision (ie. following „whoops“ procedure)

- Inadvertent positive margin (IPM)

R2 / grossly positive
