

## STRUCTURED MEDICAL ONCOLOGY REPORT

SYSTEMIC THERAPY - CHEMOTHERAPY

DATE :

reason

pre-surgery / neo-adjuvant (incl. metastasis at diagnosis)  
post-surgery / adjuvant (incl. metastasis at diagnosis)  
metastasis  
palliative  
unknown

starting date

finishing date

name of substances?

doxorubicin  
ifosfamid  
methotrexat  
gemcitabin  
etoposid  
vincristin  
actinomycin D  
eribulin  
olaratumab  
trabectidin  
pazopanib  
imatinib  
desatinib  
sorafenib  
sunitinib  
regorafenib  
cyclophosphamid  
other substance

text box

best treatment response

complete remission  
partial remission  
stable disease  
progressive disease

Success as judged by Medical Oncologist

Completed as planned

Terminated prematurely

Toxicities:

None

Neutrophils

Leucocytes

Platelets

Hemoglobin

Bilirubin

Creatinine

Amylase

Mood alteration

Fever

Cardiac arrhythmia

Rigor / chills

Vomiting

Diarrhea

Weight loss

Thyroid dysfunction

Mucositis

Left ventricular systolic dysfunction (LVSD)

Mood alteration (agitation)

Infection (normal neutrophils)

Flu-like syndrome

Pain (muscle)

Pain (head/headache)

Pain (extremity/limb)

Other toxicities

Other complications

Part of international treatment protocol?

Yes

No

Patient registered in an international study?

Yes

No

Study type:

Observational study

Cross-over study

Case-control study

Clinical study

Cohort study

Longitudinal study

Non-interventional study

Ecological study

Cross-sectional study

Prospective study

Retrospective study

Randomized controlled trial (RCT)
